

ADEJOBI SHALOM ADEBOYE

Data Analyst & Machine Learning Engineer: Data Pipelines, Predictive Modelling & Dashboards

Ogun State, Nigeria | +234 907 646 7045 (WhatsApp) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science graduate (Chrisland University, expected 2026, CGPA 4.56/5.00, First Class Honours) with over three years of hands-on experience spanning financial analysis, public sector data analytics, and machine learning engineering. Has independently engineered automated ETL pipelines for state-level financial reporting, built and deployed a machine-learning-powered digital library platform, and developed multiple independent predictive modelling projects spanning regression and classification. Comfortable working across the full data lifecycle — from loan record analysis and financial reconciliation through to feature engineering, model evaluation, and production-ready dashboard interfaces — in both remote and hybrid team settings. IBM Data Science Professional Certificate holder.

CORE SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Data Science & Machine Learning: Pandas, NumPy, Scikit-Learn, Regression, Classification, Decision Trees, Random Forest, SVM, Feature Engineering, Model Evaluation

Data Engineering: ETL Automation, Object-Oriented Programming (OOP), Data Extraction, Data Cleaning & Validation, Exploratory Data Analysis (EDA), Exception Handling

Analytics & BI Tools: Microsoft Excel (Advanced), Power BI, SPSS, QuickBooks, Jupyter Notebook, Google Colab

Financial Analysis: Loan Portfolio Analysis, Account Reconciliation, Cash-Flow Modelling, Financial Reporting

Web & Dashboards: HTML, CSS, JavaScript (interactive dashboard interfaces for data dissemination)

Collaboration & Tools: Git, cross-functional teamwork across remote and hybrid environments

PROFESSIONAL EXPERIENCE

Financial Analyst 2022 – Present

Mount Zion Cooperative Multipurpose Society | Hybrid (Remote & Onsite), Ogun State, Nigeria

- Analyze member loan records to assess repayment capacity, track outstanding balances, and flag delinquency risk for the cooperative's executive committee.
- Reconcile loan disbursement and repayment data against cooperative account records to ensure accuracy and detect discrepancies.
- Prepare periodic financial summaries and loan performance reports to support lending decisions and cooperative policy.
- Maintain structured digital records of member contributions, loan applications, and repayment schedules, working in a hybrid capacity across remote and onsite duties.
- Apply Excel-based financial modelling to project cash flow and loan portfolio health for the cooperative's savings and credit operations.

Data Mining Intern Aug 2025 – Present

GaoTek Inc. | Remote

- Execute comprehensive data mining and extraction processes to optimize vast email databases, directly supporting targeted digital marketing campaigns.
- Analyze campaign performance metrics using Excel and Python, identifying key trends to improve engagement rates and operational efficiency.
- Clean, validate, and standardize lead generation data, ensuring high data quality and accuracy for continuous outreach initiatives.
- Work independently in a fully remote setting, managing tasks, deadlines, and communication through digital collaboration tools.

Data Analytics & Software Trainee May 2025 – Sep 2025

Ogun State Bureau of Statistics (Ministry of Finance) | Ogun State, Nigeria

- Engineered and deployed custom Python scripts using Object-Oriented Programming (OOP) to automate Extract, Transform, Load (ETL) workflows, significantly reducing manual processing time for large-scale public sector datasets.
- Implemented rigorous data cleaning, validation, and exception-handling procedures, minimizing data processing errors and ensuring high statistical integrity for state-level financial reporting.
- Designed and built interactive, user-friendly front-end dashboard interfaces using HTML, CSS, and JavaScript to streamline data dissemination and internal policy reporting.

- Supervised workflow pipelines and collaborated closely with cross-functional teams of analysts to adhere to strict organizational standards and reporting timelines.
- Utilized advanced Excel and Pandas functions to cross-verify extracted data tables prior to official statistical publishing.

Data Analytics Intern Mar 2025 – Apr 2025

Leadresources | Ogun State, Nigeria

- Conducted robust statistical analysis and processed complex financial datasets utilizing QuickBooks and SPSS to support the firm's consulting projects.
- Adapted technical analytical workflows to align with accounting-focused operations, ensuring precise data collation and reporting within strict organizational deadlines.
- Learned new software tools quickly on the job and applied them to deliver accurate outputs for live client projects.

KEY PROJECTS

Intelligent E-Library Management System (Python, Machine Learning, NLP-based Search) — Undergraduate Thesis

Designed and developed a machine-learning-powered digital repository that centralizes academic resources and automates discovery for the university community, replacing a manual, catalog-based system. Built an intelligent search engine using natural language query matching and content-based classification to automatically tag and categorize resources by subject, format, and relevance, and implemented a recommendation feature that suggests related materials based on search and borrowing patterns. Architected the system's database and front-end interface end-to-end, and successfully defended the design, methodology, and implementation before the departmental panel for final year grading.

House Price Prediction Model (Python, Pandas, Scikit-Learn, Regression)

Built a supervised regression model to predict residential property prices from structural and locational features such as square footage, number of rooms, and neighborhood. Cleaned and preprocessed raw real estate transaction data, handling missing values, standardizing numerical attributes, and one-hot encoding categorical variables to optimize model convergence. Trained and compared multiple regression algorithms, selecting the best-performing model based on R^2 and RMSE metrics, then built a responsive web interface allowing users to input property features and receive real-time predicted price estimates.

Rain Classification Model (Python, Scikit-Learn, Decision Tree, SVM)

Developed a supervised classification model to predict the likelihood of rainfall using historical weather variables such as humidity, temperature, wind speed, and atmospheric pressure. Performed exploratory data analysis to identify the weather features most correlated with rainfall, applied feature scaling and class-imbalance handling, then trained and evaluated classification algorithms using accuracy, precision, and recall to select the model best suited for practical rainfall forecasting. Presented the methodology and results as part of a SIWES project defense.

Multi-Class Drug Response Classifier (Python, Decision Tree Classifier)

Built an interpretable Decision Tree classifier to analyze patient health attributes (Age, Blood Pressure, Cholesterol) and predict optimal treatment pathways. Processed and structured categorical and numerical data matrices, ensuring complete accuracy across cross-validation data splits.

Customer Churn Prediction Model (Python, Pandas, Scikit-Learn, Classification)

Built a classification model to predict customer churn using behavioral and account-level features such as usage patterns, tenure, and service subscriptions. Performed data cleaning, exploratory data analysis, and feature engineering to identify the strongest churn indicators, then trained and evaluated classification models to flag at-risk customers, supporting proactive retention strategies.

CERTIFICATIONS & PROFESSIONAL MEMBERSHIP

- IBM Data Science Professional Certificate — Coursera
- Data Analysis with Python — UniAthena
- Data Analytics — GlobalLearning
- Data Analytics Course — Global Learning
- HP LIFE Data Analytics Certificate
- Member, Nigerian Computer Society (NCS) — in view
- Computer Professionals Registration Council of Nigeria (CPN) — in view
- Student Industrial Work Experience Scheme (SIWES) Certification — Industrial Training Fund (ITF)

EDUCATION

BSc Computer Science (First Class Honours)

Chrisland University, Ogun State, Nigeria

Expected 2026 | CGPA: 4.56/5.00 (First Class Honours)

LANGUAGES

English (Fluent)

AVAILABILITY

Open to Internship, NYSC Placement, and Full-Time Opportunities | Remote, Hybrid, or Onsite
